

CMSI 401 Project Status Sheet

Fall 2005

| | | | |
|-----------------|--------------|------------------------|-------------|
| Name: | Jordan Woods | Date: | 2/19/18 |
| Project: | TextBooked | Period Covered: | 2/12 – 2/19 |

Accomplishments since last report:

- Completed most of course in iOS development – everything needed to be able to make TextBooked.
- Started making the login page frontend.

Scheduled tasks to be done by next report:

- Get most of the frontend done

Noteworthy risks, concerns, or problems:

- Not much of a problem, but I will probably need to go back and watch a lot of the course while creating my app because I am already forgetting what I learned. This isn't a problem though because I have the videos to look back at.
